ABOUT COMPANY

Microstone was born from an ambitious vision during one of the most challenging times the world has faced, the year 2024, in the midst of a global pandemic that upended the economy. While many companies were struggling to survive, Microstone chose to launch with strength in the United Arab Emirates market, known as one of the most competitive markets in the world.

Architectural Design

Microstone specializes in aesthetic-driven design that harmonizes with the environment, blending natural beauty with functional architecture. From detailed planning to exquisite finishes, our design team focuses on innovative and culturally relevant concepts that resonate with today's architectural demands.

Smart Building Solutions

We integrate advanced technology into our projects, supporting the development of smart buildings that enhance convenience, energy efficiency, and sustainability.

Infrastructure Development

Microstone also provides comprehensive solutions for infrastructure development, helping to shape future-ready cities with state-of-the-art planning and execution.

Training Programs

Our training division offers workshops in the latest engineering technologies, including AutoCAD, Revit, and 3D Max, to equip young talent with essential skills for a modern architectural career.

MISSION & VISION

From the very beginning, Microstone's goal was clear: to deliver architectural and living experiences that go beyond the present and meet the aspirations of the future. The mission was not merely to construct buildings, but to create a smarter, more comfortable, beautiful, and sustainable world. The company achieved this by integrating advanced engineering, innovative design, and smart technologies into every project.

What truly sets Microstone apart is its vision for the future, offering modern services that support sustainable environments through cutting-edge systems. Every project, whether residential or commercial, is completed to be more than just a space for living or working; it provides a holistic environment that elevates daily life to new heights.

CEO Statement

At Microstone, we are driven by a passion for transforming spaces into experiences. Since our founding, we have set out to reimagine the possibilities within the construction and design industries, blending innovation with sustainability to create environments that enhance quality of life.

Our journey started in a challenging global landscape, but through commitment, creativity, and resilience, we have evolved into a company that shapes not only structures but entire communities. Every project we undertake reflects our dedication to excellence, sustainability, and the highest standards of engineering and design. As we continue to grow, our focus remains firmly on building a future where architecture serves not just a function but also a purpose enriching the lives of those who live, work, and thrive within the spaces we create.

We are proud to be a part of the UAE's dynamic landscape, contributing to its vision of becoming a global hub for innovation and sustainability. As Microstone looks to the future, our commitment to leading the industry with quality and integrity is stronger than ever. Together, we are building a legacy of excellence, one project at a time.

OUR SERVICES

Infrastructure

Infrastructure refers to the fundamental facilities and systems that support the sustainable functioning of a community, region, or country. It includes both physical and organizational structures such as transportation networks (roads, bridges, airports), utilities (water supply, electricity, telecommunications), and essential services like schools, hospitals, and emergency services. Strong infrastructure is crucial for economic development, as it enables efficient movement of goods and services, connectivity, and access to resources, enhancing the overall quality of life. Additionally, modern infrastructure planning often incorporates sustainability and resilience to address environmental challenges and future growth.

Infrastructure refers to the fundamental facilities and systems that support the sustainable functioning of a community, region, or country. Additionally, modern infrastructure planning often incorporates sustainability and resilience to address environmental challenges and future growth.

ENGINEERING WORKS

Shop Drawing

are detailed representations of how specific components of a project will be constructed and assembled. Typically created by contractors, manufacturers, or fabricators, these drawings serve as a bridge between the design phase and actual construction, ensuring that every

As-built Drawings

If you work as a general contractor, you might wonder, "Why should I give as-built drawings extra attention at the end of a project?" Well, the truth is, you shouldn't only think about making as-builts; you should also aim to enhance the quality of the materials you provide.

Construction Management

Improved Planning and Scheduling: They enable detailed scheduling, allowing for better anticipation of challenges and efficient resource allocation.

Safety/Quality Project Plan

Improved Planning and Scheduling: They enable detailed scheduling, allowing for better anticipation of challenges and efficient resource allocation.

Surveying Works

At MICROSTONE , we excel in providing comprehensive surveying services designed to meet the unique requirements of our clients in the construction and real estate sectors. Our dedication to precision, accuracy, and innovation distinguishes us as a leader in the surveying industry.

No Objection Certificates

At MICROSTONE, we offer comprehensive services for obtaining No Objection Certificates (NOCs) to ensure the smooth execution of construction and real estate proj-

Taking Over Certificates

At MICROSTONE, we recognize the importance of Taking Over Certificates in the construction process. These certificates serve as formal documentation that signifies the completion of a project or a specific phase, allowing clients to take possession of the work done. Our team is dedicated to ensuring a smooth and efficient process for obtaining these certificates.
